## Education

B. S.           University of California, Davis  
Major: Atmospheric Science  
Minor: Computer Applications

## Employment

Nov. 1996 to Present	Data Assistant with the Montana Natural Heritage Program, Helena, Montana. My responsibilities include working with ArcView, ArcMap, Microsoft Access databases, Excel spreadsheets and Word documents to maintain a comprehensive database of Montana plant and animal species of concern. My work has also involved working with proprietary databases, mapping skills and public contact.
Feb. 1982 to Sep. 1988	Computer programmer and analyst for Hydrometrics, Inc., Helena, Montana. As the principal computer programmer, my responsibilities included development of new application software and the maintenance of existing programs. Programming on Apple II and IBM personal computers, I developed and implemented software for hydrological and water quality data processing.
Aug. 1979 to Jan. 1982	Research Technician at the Water Research Laboratory, Utah State University, Logan, Utah. I was involved in all aspects of a weather modification research project including data analysis, field work and report preparation.
Mar. 1975 to Aug. 1979	Meteorologist employed by ASARCO, Inc., East Helena, Montana. As meteorologist, my responsibility was the operation of an intermittent control system for the maintenance of ambient air quality standards. Interpretation of a variety of information was required, including temperature profile, wind and acoustic radar data.
Jun. 1973 to Sep. 1974	Engineering Aide with the Atmospheric Science Department, University of California, Davis. I was employed on a part time basis to assist in data reduction and analysis of atmospheric radiation data.
